4. How the files work together

- Update the **break tracker** as items are cleared. In the dashboard, choose *Load the updated tracker* and pick that file: the progress updates, and the file stays on your computer.
- In the **workbook**, yellow cells are yours to change.
- The **presentation** carries speaker notes on every slide and its charts can be edited in PowerPoint.
- Editing the Excel and PowerPoint files needs Office, or a free tool such as Google Sheets and Slides. Reading them does not: both are inside `00_START_HERE`.

5. What we need for the next run

The same nine files for the new period, ten days of bank data past the period end, and the tracker with its outcomes.

6. Data and access

All client data will be deleted within 10 business days of the end of the engagement (or retained for the next run as agreed).
